

# MWI Components

**M**WI Components, honored with its seventh Gold Key of Excellence, thanks its customers for their confidence and support. MWI pledges to provide quick delivery, excellent service and innovative products that make a customer's job easier.

MWI makes cupolas in a variety of sizes, from 24x24- to 36x36- and 48x48-inch standard sizes. The newest cupola designs are 66-inch square and 48- and 84-inch octagon cupolas. MWI's new powder-coated universal base requires no flashing assembly. It arrives ready to be mounted, saving time, labor and cost.

Ridg-Vent roof ventilators come in six styles with wider flange options available. Soffit is available in either steel or aluminum. There are four different trim profiles. MWI provides pre-painted

steel products in over 100 colors and can match almost any metal building color.

MWI is a leading manufacturer of equine building components, producing stalls, Dutch doors and sliding doors with a full-service in-house powder coat paint line. MWI also powder-coats three profiles of slide door rails, painted quickly to finish a building so customers no longer have to settle for white doors or black stalls. MWI currently offers over 30 different colors of powder coat paint.

In 2006, MWI purchased the slide door track and hardware division of Lawrence Hardware, creator of square track slide door systems. This enables MWI to offer a complete

selection of American-made round and square track and hardware.

MWI offers PVC, polycarbonate, Tempshield insulation, Uni-Vent II and Uni-Seal material, ideal for use in new construction or retrofit installation. Products are recognized for thermal performance, easy installation, versatility, price and environmental friendliness.

MWI's management staff appreciates all the customers who have supported the company over the years and looks forward to growing, along with those customers, in the future. ■
